**Press release: Fischer Fuel Cell Compressor AG receives IATF 16949 certification - A significant step towards highest quality and customer satisfaction**

Fischer Fuel Cell Compressor AG has successfully obtained the IATF 16949 certification in accordance with the new global automotive quality standard. This success underlines our commitment to the highest quality standards and process optimization in the manufacturing of compressors for fuel cell technology.

The IATF 16949 certification is an important milestone for our company, as it fulfills the strict requirements of the automotive industry and certifies the system and process quality for our entire product portfolio. For a specialist like us, which focuses on the production of high-tech air compressors, this step is of particular importance. The certification shows that we can already comply with the highest standards with small quantities, which is very important for our customers in the mobility sector.

"The IATF 16949 certification is a further proof of our commitment to offering our customers not only high-quality products, but also excellent service. As a supplier in a sector as demanding as fuel cells, it is a particular challenge to meet these global standards. We are proud to have mastered this challenge and see ourselves in an excellent position to continue to act as a reliable partner for the automotive industry and other branches of industry in the future," explains Jens Krechting, Head of Sales and member of the Management Team of Fischer Fuel Cell Compressor AG.

With the IATF 16949 certification, Fischer Fuel Cell Compressor AG confirms its outstanding quality and ability to successfully meet the requirements of the automotive industry. This strengthens our position as an innovative and reliable partner in fuel cell technology and ensures even greater confidence among our international customers. Fischer Fuel Cell Compressor AG was supported in the implementation by Schröder-Technik, based in Alpen, Germany. The company ensured a smooth transition to the requirements of IATF 16949 and offered targeted solutions.

**About Fischer Fuel Cell Compressor AG:**

Fischer Fuel Cell Compressor AG is a leading company in the field of air compressors and develops innovative compressors with spiral groove bearings for the fuel cell industry. With a clear focus on quality, precision and customer satisfaction, the company delivers highly developed products that play a key role in shaping the future of mobility.
